Mediterraneo Modular Planting System

All products of Mediterraneo family are made of premium quality plastic body and modular aluminum legs. The guiding idea was to create a modular system, which can easily switch from outdoor to indoor.

Mediterraneo
Round 40

With simply combining several shapes, colours and legs, it is easy to turn the Mediterraneo components into playful personal creations.

Mediterraneo
Square 40

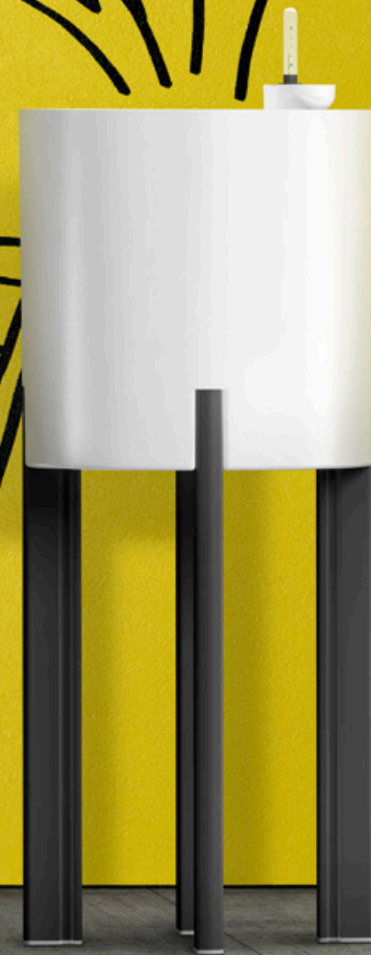

Simple pot with changeable height reached by using the legs in different length can easily be transformed into a table by adding the Mediterraneo table part with a simple move.

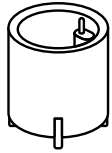

Mediterraneo
Table Round 80

Mediterraneo Rund 40,
Square 40 with Table Square 80

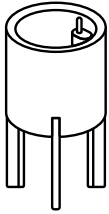

Due to its superb quality and
refined design, every Mediterraneo
product is more than just a pot,
it is a piece of furniture which
will enlighten your space.

PATENT PENDING

Pot Structure

PP-CoPo (polypropylene), through-coloured made by injection moulding process. With additive against UV rays, antistatic, 100% recyclable. High mechanical resistance, made in great collision-proof plastic.

Leg Structure

Aluminum extrusion profile with different anodized finishing, 100% recyclable. High mechanical and static resistance.

Maintenance

To remove the dust from plastic surfaces, the product needs periodic cleaning with a damp cloth soaked in neutral liquid soap, preferably diluted with water. Avoid the use of ethanol or any liquid containing, even in small amounts, acetone, trichloethylene and ammonia (solvents in general).

Recycling

It cannot be treated as domestic waste. Correct disposal will contribute to avoid danger to the environment, people and animals, and will favour the recovery of recyclable materials of which it is made. When the product has finally reached the end of its life, it will have to be sent to the Differentiated Collection Centres.

Warning

Comply with the cleaning instructions and appropriate use of the product. Do not stand on the can, the pot must have the feet resting on a regular and flat surface. When the can is to be moved, take care to lift the product of the ground to avoid damage. Keep away from excessive heat sources.
